Facilitator: Joakim Agnemyr

Participants: Joakim Agnemyr, Edwin Eliasson, Viktor Valadi, Mona Kilsgård

Not in attendance:

Date: 13/9/2018

Meeting Agenda

Fourth group meeting for group Yellow

§1 Objectives

1. Decide what changes needs to be done to the GUI
2. Add two more classes to the domain model

§2 Reports

- Domain model needs some work, it was too simple with just 5 classes.
- User stories are still not good enough, needs more work
- Monas GUI is almost finished

§3 Discussion Items

1. How should the flow in the app be structured, what to do first etc…
2. Domain Model, what more is needed?
3. What needs to be changed in the GUI?
4. RAD, what is it and what should be in it?
5. Flutter doesn't work, is Android Studio an option?

§4 Outcomes and assignments

Outcomes:

1. The app is mainly for communities that wants to lend stuff to people. You create an user in the app that can create an inventory. You invite others users within your community to your inventory, where you can add different things to lend out. All the items should be displayed in a list and show if they are available or not. If you want to lend out something you create an order and add different items to the order. You should also be able to check in a calendar when the items are not available.
2. We added two more classes to the domain model, an order and a calendar.
3. The group needs to speed up the work
4. The GUI needs to be more tailored for communities, and totally ignore the "customer" for a start. We don't want users that just want to rent stuff, the users is for hiring out only.
5. The RAD document needs a lot of thinking, we will postpone this until the next meeting.
6. Android Studio works and is quite easy to learn for starters, so this will be used for making the app.

Assignments:

Mona will update the GUI.

Number one priority is still for everyone to complete the workshops.

Joakim will fix the domain model in Google and update it.

Everyone should think and fix the User Stories.

Viktor will start with the RAD document.

§5 End of Meeting

Next meeting is Sunday 16/11.
